

How to play Nonogram

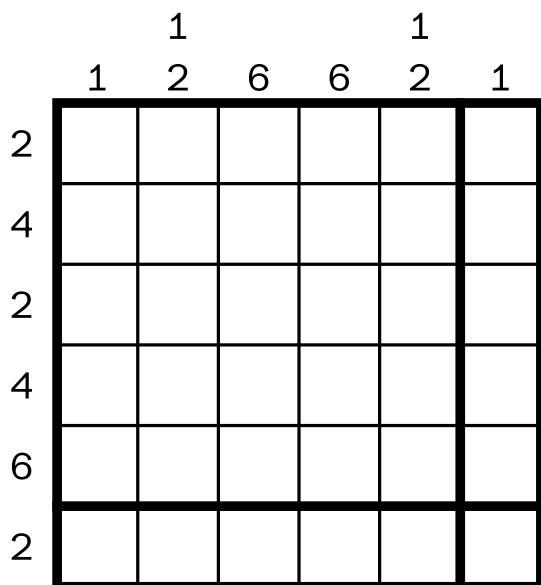

Each day starts with one: shade the right cells and a Christmas picture appears. Its name is printed only with the solution.

- 1 The numbers beside each row and above each column give the lengths of the runs of shaded cells in that line, in order from left to right or from top to bottom.
- 2 Between two runs in the same line there is at least one empty cell. A 0 means the whole line stays empty.
- 3 Mark the cells you know are empty with a small dot. Every grid has exactly one picture, and you can reach it line by line, without guessing.

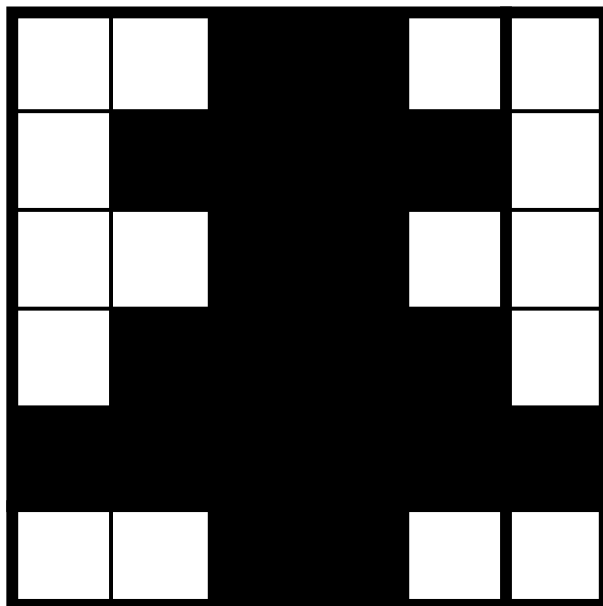

WHERE TO START

Start with the big numbers. In a line of 10 cells, a run of 8 always covers the 6 middle cells, wherever it starts. Then look for lines where the numbers plus one gap between each pair add up to the full length: those lines can be shaded in only one way.

EXAMPLE

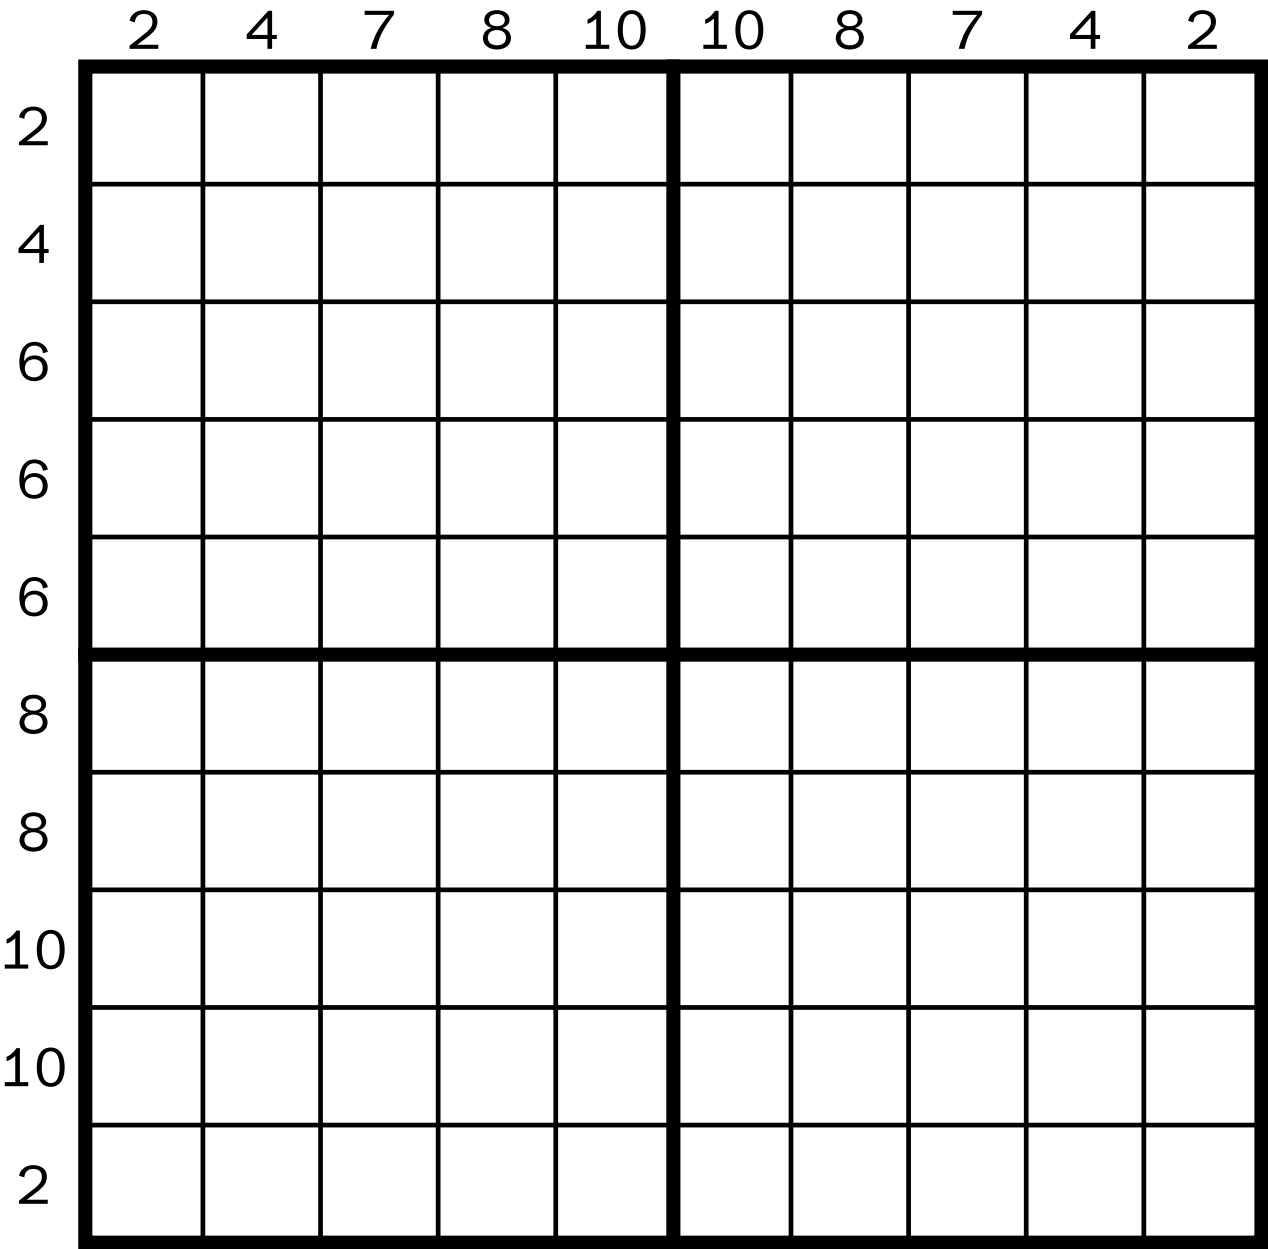

ITS ONLY SOLUTION

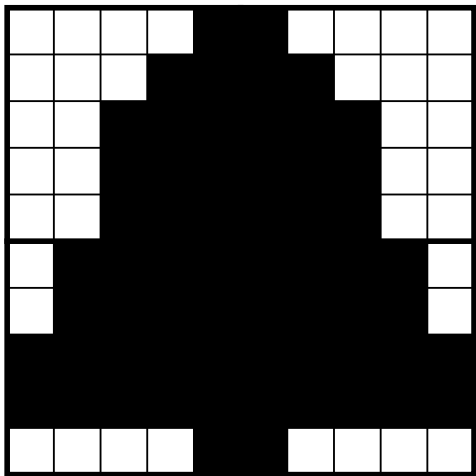

December 1

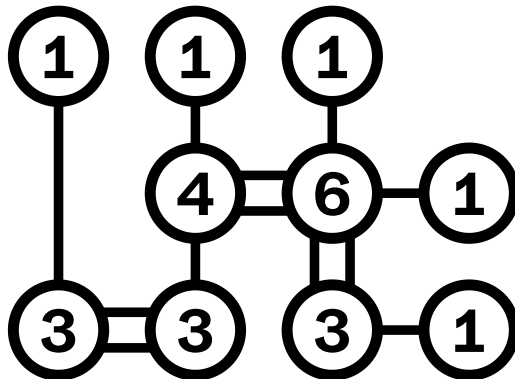

FRONT • NONOGRAM • 10 × 10

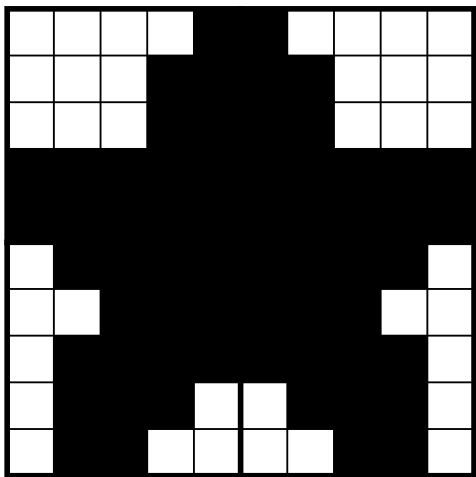

DEC 1 • NONOGRAM • BELL

DEC 1 · HASHI

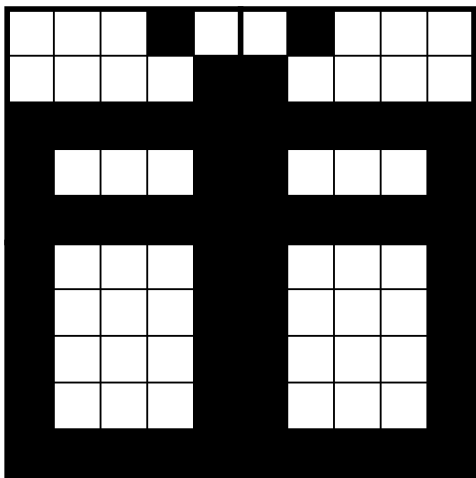

DEC 2 · NONOGRAM · STAR

DEC 2 · KAKURO

	1	9			
	2	7	8		
		6	2	5	
			9	8	5
				9	4

DEC 3 • NONOGRAM • GIFT

DEC 3 • SLITHERLINK
