How to play Magpies E-ink

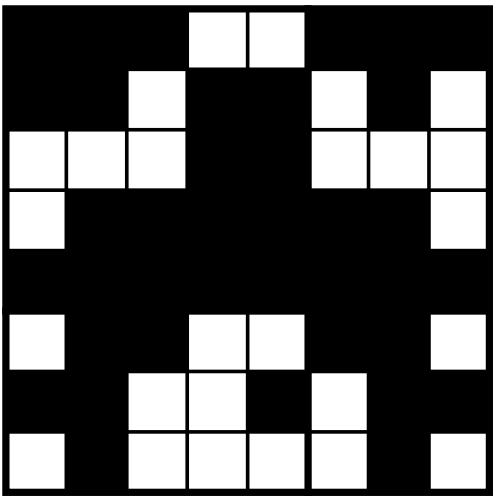

NONOGRAMS

- 1 The numbers beside every row and above every column give the lengths of the blocks of filled cells, in order, with at least one empty cell between two blocks.
- 2 A filled cell is a cell a magpie left something shiny in. An empty cell is nothing. Work out from the numbers alone which is which.
- 3 Exactly one picture fits every number, and it can always be reached by reasoning, never by guessing. A cross is your own note that a cell stays empty.

ONE WORKED EXAMPLE

ITS ONLY SOLUTION

Puzzle numbers and levels: 1 to 100 easy, 101 to 200 medium, 201 to 300 hard. Solutions start on the page marked Solutions at the back. The next page is a tappable contents list; every puzzle page links to its solution and back.

Contents

Free sample: 10 puzzles from Volume 1

Tap a number to open that puzzle. Every puzzle page has a Solution link, and every solution links back to its puzzle.
