How to play Voles

NURIKABE

- 1 Every number is a vole family, and it says how big their island is, the number's own cell included. Shade the rest of the meadow as water so that every island holds exactly one number and exactly that many cells.
- 2 Islands never touch by a side. Two islands may sit corner to corner, never side by side, or they would be one island with two numbers.
- 3 The water always hangs together as a single sheet, and no two by two block is ever all water.
